phi 97/100, strong delay, gaussian	65537	Supplied persistence, recorder bits 12	200/0/0	[0.981, 1.000]	Source reversibility under stated assumptions
phi 97/100, strong delay, gaussian	65537	Two-sided set, recorder bits 12	0/0/200	[0.000, 0.019]	Source reversibility under stated assumptions

R, rejection; NR, nonrejection; A, abstention. Intervals use all records. Displayed endpoints round outward to 0.001. The nominal target does not give a size guarantee. Violated source, covariance, response, or error assumptions remove that guarantee. The baseline comparators have no finite-record source-null guarantee here.
